SUMMARY

Aspiring Computer Engineer at Istanbul Technical University with a proven track record in software development across Java, C++, and modern web frameworks such as Next.js. Currently co-leading the architecture of a decentralized fintech project, **DeChat**, presently competing in the final stage of the **Teknofest 2026** national competition. Combines academic rigor with a hands-on, problem-solving mindset and thrives in collaborative, fast-paced project environments.

EDUCATION

Istanbul Technical University **Istanbul, Türkiye**
B.Sc. in Computer Engineering — 4th Year *Expected 2027*

- GPA: 3.36 / 4.00

Halil Kale Science High School **Manisa, Türkiye**
High School Diploma *2018 – 2022*

- YKS 2022 (University Entrance Exam) — National Ranking: **909**

EXPERIENCE

Token Finansal Teknolojiler **Hybrid / Istanbul, Türkiye**
Test Automation Intern *Jul 2026 – Aug 2026*

- Automated an existing manual test checklist as part of the Test Automation team.
- Participated in weekly sprints, gaining hands-on Agile development experience.
- Built a test automation library with **Appium** and **pytest** to streamline test creation.

Yaşar Bilgi **Hybrid / Izmir, Türkiye**
Fullstack Development Intern *Jul 2025 – Aug 2025*

- Built and contributed to a Work Scheduling System as part of a development team.
- Worked across the full stack to deliver functional features within a one-month internship cycle.
- Project repository: github.com/Deniz1433/Work-Scheduling-System

İTÜ VCAMP Project Team **Istanbul, Türkiye**
Vice Team Lead *Feb 2025 – Sep 2026*

- Co-led a student project team working on blockchain and AI initiatives.
- Coordinated team members and supported technical decision-making across projects.

İTÜ AnthRo **Istanbul, Türkiye**
Management Team Member *Feb 2026 – Sep 2026*

- Served on the management team, contributing to organization, planning, and team coordination.
- Developed robotics-focused projects, working on design and implementation within the team.

PROJECTS

DeChat | dechat.tech
Co-Founder & Lead Developer

- Developing a decentralized messaging and fintech application built on **Next.js** and **XMTP** messaging infrastructure.
- Currently under evaluation for the **İTÜ Çekirdek Incubation Program (2026)**.
- Currently competing in the **final stage** of **Teknofest 2026**, having managed the technical roadmap and team coordination through prior competition milestones.

SKILLS

Programming Languages	C, C++, Python, Java, Solidity, Assembly
Web Development	React, Next.js, TypeScript, JavaScript, HTML5, CSS3
Blockchain & Fintech	XMTP (Messaging Infrastructure), Decentralized Applications (dApps)
Frameworks & Tools	Spring Framework, Appium, pytest, Git, Agile / Scrum Methodologies
Languages	Turkish (Native), English (Professional Proficiency)
