SUMMARY

4th-year Computer Engineering student at Istanbul Technical University building decentralized fintech applications with Next.js and XMTP, and focusing on C++ algorithm solutions. Teknofest 2026 finalist with a strong foundation in full-stack development, test automation, and leading cross-functional student project teams from ideation to delivery.

EDUCATION

Istanbul Technical University

B.Sc. in Computer Engineering — 4th Year / GPA: 3.36 / 4.00

Istanbul, Türkiye

Expected 2027

Halil Kale Science High School

High School Diploma / YKS 2022 National Ranking: 909

Manisa, Türkiye

2018 – 2022

EXPERIENCE

Token Finansal Teknolojiler

Test Automation Intern

Hybrid / Istanbul, Türkiye

Jul 2026 – Aug 2026

- Automated a manual POS device test checklist, reducing testing time from 12 to 2.5 hours and eliminating manual effort.
- Built a test automation library with **Appium** and **pytest**, significantly reducing the overhead time for building the test app repository and page objects.
- Participated in weekly sprints, gaining hands-on Agile development experience.

Yaşar Bilgi | GitHub Repo

Fullstack Development Intern

Hybrid / Izmir, Türkiye

Jul 2025 – Aug 2025

- Engineered a Work Scheduling System utilizing **Java**, **Spring**, **Next.js (React)**, **Keycloak**, and **PostgreSQL**.
- Integrated **cronjobs** for scheduled tasks and translated **Figma** designs into functional UI components within a one-month sprint cycle.

İTÜ VCAMP Project Team

Vice Team Lead

Istanbul, Türkiye

Feb 2025 – Sep 2026

- Managed a 26-person student project team working on blockchain and AI initiatives.
- Oversaw technical decision-making, delivery of small-scale projects, and the soft skill development of team members.

İTÜ AnthRo

Management Team Member

Istanbul, Türkiye

Feb 2026 – Sep 2026

- Served on the management team for a 30-person robotics project team.
- Managed the recruitment process and oversaw personnel management, ensuring effective team coordination.

PROJECTS

DeChat | dechat.tech

Co-Founder, Lead Developer & Project Manager

- Established the core architecture, selected the tech stack, and authored the majority of the codebase for a decentralized messaging and fintech application using **Next.js** and **XMTP**.
- Served as Project Manager, leading the technical roadmap and team coordination through multiple competition milestones.
- Currently competing in the **final stage** of **Teknofest 2026** and under evaluation for the **İTÜ Çekirdek (2026)**.
